

ACTIVITIES REPORT JUNE QUARTER 2015

GTI board continues to exhaust all avenues in locating a suitable opportunity that would advance the company and all shareholders interests.

Many opportunities have been evaluated by the team both in Indonesia and in other countries however at this time a suitable project has not been identified.

During the quarter GTI sold its royalty interest in the Yangibana project for \$150,000 cash.

GTI is entitled to a one off payment of \$500,000 from Hastings Rare Metals Ltd (HRM) subject to completion of a bankable feasibility study (BFS) and on first draw down of funds to finance the development of the mine by (HRM).

Shareholders will continue to be fully informed of progress on developments, as they advance past the preliminary stage.

The board continues to investigate alternative funding opportunities to provide ongoing working capital to the company, including potential capital raisings however no decision has been made on a raising at this stage. Other funding alternatives include short term unsecured borrowings and joint venture opportunities.

In the interim short term funding requirements are being satisfied by small placements and unsecured loans from directors on an as required basis. The company is of the belief that it will have sufficient working capital and financial support to fund ongoing activities.

Murray McDonald
Executive Chairman
